

To start a Snapfish account:

Go to Snapfish.com and hit the button **Start Here**.

This takes you to the registration page. Fill out all the information and keep your username and password in a safe place.

Check out the terms and conditions and, if you agree, check the box and then hit the **GO Fish** button. You are now a registered user.

You can now either follow the instructions on the upload page or do the following.

After logging in, you will come to the upload page. Click on **Upload Photos**. Here you can either keep the album named, which is some combination of the date, or rename it to something unique. You may or may not want to add a description. (Your choice)

Next, click on **Upload to this album**. On this page, click **select photos and videos**.

On the **Look in** box use the arrow to find where your pictures are on your computer. Once you find them, click on each picture you want to upload. When you are done, click upload photos. Continue the process by placing your order with a store near you. When completed, you will be told when to pick them up and at what time they will be ready. It is usually within a few hours.

Good Luck!
